SUMMARY

Java Backend Developer specialized in Spring Boot and microservices, with experience building RESTful and reactive systems using Docker, relational databases, messaging, and monitoring tools. Proficiency with Artificial Intelligence tools and LLMs like Claude, GPT and Copilot to move faster on boilerplate and debugging. Proven ability to design clean, testable backend architectures and deliver production-ready services. Background in project management and process optimization.

SKILLS

Programming Languages & Frameworks:

- Java, Spring Boot, Hibernate, HTML, CSS, JavaScript, React, RESTful APIs, Microservices, Python.

Development Tools & Practices:

- Git & GitHub, Docker, CI/CD, Claude, Chat GPT, Copilot, SQL, TDD, SonarQube, Prometheus & Grafana, ActiveMQ Artemis, OAuth2 & JWT, Debugging & Troubleshooting.

Software Development Methodologies:

- Agile, Object-Oriented Programming, DSA, Clean Architecture, Design Patterns.

Professional Skills:

- Project Management, Problem Solving, Communication, AI, Time Management, Analytical Thinking.

SOLO DEVELOPMENT PROJECTS

Riot API Microservice: <https://github.com/JAntonioArango/RiotApiService>

- Designed a reactive Spring Boot microservice consuming external APIs with Redis caching to reduce response latency and external API calls.
- Java, Spring WebFlux, Redis, Docker, Swagger/OpenAPI, Maven, Spring Boot Actuator.

Gym App: <https://github.com/JAntonioArango/GymApp>

- Scalable microservices ecosystem for gym management. Implemented JWT for secure stateless authentication and deployed Prometheus/Grafana to visualize real-time system health.
- Java, Docker, JWT, MySQL, OpenAPI, Prometheus, Grafana, Artemis ActiveMQ, SonarQube, JaCoCo.

Learn App: <https://github.com/JAntonioArango/LearnApp>

- Full-stack React + Express learning platform with responsive design, enabling students and trainers to manage registrations, trainings, and accounts with secure authentication.
- React 19, Redux Toolkit, Express, Jest, React Testing Library, Vite, ESLint, Husky git hooks.

Inventory Management System: <https://github.com/JAntonioArango/StoreInventorySystem>

- Spring Boot REST API-based inventory management system (CRUD, MySQL, tests...)
- Java, MySQL, Maven, JaCoCo.

LANGUAGES

Spanish: Native

English: B2+

WORK EXPERIENCE

Production and Cost Auditor. CRI	[04/2025 – present]
• Analyzed production data and cost structures to identify inefficiencies, applying structured problem-solving and root-cause analysis. • Designed and implemented process improvements that increased operational efficiency by 10% and reduced costs by 5%, emphasizing measurable outcomes.	
Technical Project Manager. GoSupport	[08/2020 – 03/2025]
• Supervised technical operations and infrastructure-related projects, ensuring service reliability and compliance with quality standards. • Defined and monitored performance indicators to improve efficiency and incident resolutions.	
Commercial and Engineering Coordinator. Rodarangos	[04/2018 – 07/2019]
• Coordinated engineering and commercial projects, ensuring compliance with standards and deadlines.	
Industrial Process Technician and Sales Consultant. Rodando	[09/2012 – 11/2017]
• Managed logistics, procurement, and process coordination activities in industrial maintenance operations.	

EDUCATION AND TRAINING

Front-End Development Specialization. EPAM Campus	[06/2026]
Java Specialization. EPAM Campus	[12/2025]
Bachelor of Science in Mechanical Engineering Universidad de Antioquia	[01/2025]
Java Fundamentals. EPAM Campus	[01/2025]
Automated Testing in Java. EPAM Campus	[12/2024]
Hackathon Winner. Talento Tech MINTIC	[12/2024]
Bootcamp Software Development Java. Talento Tech MINTIC	[12/2024]
Java Elementary. EPAM Campus	[09/2024]
Program for environmental leaders and activists. Secretaría de Medio Ambiente de Medellín	[02/2015]
Accounting Technician. Servicio Nacional de Aprendizaje (SENA)	[11/2011]
